PROFILE

Experienced in data cleaning, analysis and reporting using Excel, Power Bi and Python. Skilled in building predictive models, preprocessing data, Seeking to contribute my analytical, statistical and process driven skills to real world business problems.

SKILLS

• **Tools and Technologies:** MS-Excel (Pivot Tables, VLOOKUP/XLOOKUP, INDEX-MATCH, Formatting, IF, SUMIFS), Power Bi (DAX, Power Query, Dashboards), SQL(Joins, Sub-Query)/ Alteryx, APIs, Python (NumPy, Pandas, Seaborn), Machine Learning (Scikit-Learn), Google Sheets, Looker Studio, Data Validation, Visualization, CRM, KPI Tracking, EDA, AI, Typing (30 WPM English & Marathi).

• **Business and Soft Skills:** Problem Solving, Presentation, Collaboration, Attention to Detail, Analytical Thinking, Reporting, Communication, Time management, Creativity, Logical Reasoning, Documentation.

EXPERIENCE

Multi-Spark Technologies ***Kolhapur, Maharashtra***
Data Analyst Intern ***2 June 2025 – 29 Nov 2025***

• Executed end-to-end data analysis including preprocessing, cleaning, and visualization using Excel, Power BI, delivering automated dashboards and structured reports that improved reporting efficiency by **~20%** & enhanced data accuracy for weekly, monthly management reporting, while supporting pricing decisions and margin analysis to improve profitability insights.

• Analyzed large-scale datasets across multiple business functions to identify trends, track key performance metrics, and generate actionable insights that supported performance monitoring, decision-making and business growth initiatives.

iGAP Technologies Private Limited ***Kolhapur, Maharashtra***
Educational Mentor ***Dec 2024 – Oct 2025***

- Mentored students in understanding core data analytics concepts, helping them bridge the gap between theory and practical application.
- Designed structured learning plans and progress-tracking templates to monitor student development effectively.
- Introduced structured performance evaluation using Excel-based trackers, which increased overall student project completion rates by **25%** and improved session attendance consistency.
- Collaborated with faculty and management to improve student engagement through project-based learning and regular feedback cycles.
- **Operational efficiency** in progress monitoring increased, reducing manual tracking efforts.

Chanakya Academy, Kagal ***Kolhapur, Maharashtra***
Teacher ***Jan 2022 – Oct 2025***

- Taught **Mathematics and Science** to State Board and CBSE students, ensuring conceptual clarity through interactive and application-based teaching methods.
- Designed lesson plans and practice materials aligned with the school curriculum to strengthen analytical and problem-solving skills among students.
- Conducted regular assessments, mock tests, and feedback sessions to evaluate academic progress and tailor support for individual learning needs.
- Acted as an **academic mentor** for slow and high-performing students alike, guiding them in time management and exam preparation strategies.

EDUCATION

Master of Science (M.Sc.) in Statistics ***Oct 2022 - Nov 2024***
Shivaji University, Kolhapur

Bachelor of Science (B.Sc.) in Statistics ***July 2018 – Aug 2021***
Rajaram College, Kolhapur

PROJECTS

Bicycle Shop Sales Analysis Project | MS Excel GitHub

- Designed and delivered an interactive **Excel sales dashboard** (Pivot Tables, Slicers, Charts, Formatting) to analyze sales data, enabling leadership to track 11.87 Cr revenue, 1.68 Cr profit, and 14.23% margin and support faster, data-driven sales reviews.
- Generated actionable insights by identifying the top-selling product (₹3.30 Cr revenue), peak profit months (June–July), and highest-value customer (39.56 lakh), helping inform inventory planning, price optimization, and targeted customer strategies.

Hospital Emergency Room Analysis | MS Excel GitHub

- Developed an interactive dashboard to monitor patient flow, service efficiency, and wait times, enabling stakeholders to make data-driven decisions and improve ER operations.
- Generated actionable insights to optimize resource allocation, reduce patient waiting, and enhance overall service quality.

Techno-Edge Sales Analysis (FMCG) | MS Excel, Power BI GitHub

- Analyzed sales data to track sales, profit, margins, customer behaviour and product performance across regions and categories.
- Improved reporting efficiency by ~20% by automating dashboards, enabled optimization of sales and enabling faster identification of trends, high-performing products, and profitability gaps.

Banking Customer Behaviour Analysis | Power BI GitHub

- Analyzed customer accounts, balances, and loan data to uncover behavioural patterns and preferences, providing insights to support targeted banking strategies and improve customer engagement.

Customer Churn Prediction (Telecom) | Machine Learning GitHub

- Built customer churn prediction models using Random Forest and SVC, leveraging EDA and feature engineering to identify high-risk customers. Improved predictive accuracy by 15% and presented insights using Matplotlib and Seaborn to support business decisions.

CERTIFICATIONS

- Microsoft Excel with AI – Skill Course | Dec 2025
- Power Bi Certificate – Skill Course | March 2025
- SQL Certificate – Skill Course/ Hacker Rank | May 2025
- AI-Machine Learning Certificate – NSDC | July 2025
